

Organics

The Grow West[®] organics division provides non-traditional production offerings for a wide array of specialty crop operations. We carry a complete line of organics including custom soil blending and a wide variety of fertilizers, soil amendments, micronutrients, amino acids, biological stimulants and more. We want to provide environmentally responsible and biologically correct materials to best meet your needs.

We understand logistics. With excellent leadership and communication through our entire process, we ensure that your needs are met, even when conditions change. Our team of drivers are proud of work they do, with excellent records of safety through CHP and DOT. From our drivers to our dispatch team, we will take time to understand your operation to best serve your needs.

Unique Offerings

INDUSTRY LEADING PRODUCTS

We offer a diverse portfolio of products in a variety of categories to ensure we have the products that you need. From fertilizers, biological stimulants, fungicides, and micronutrients, we provide it all. Visit our website for easy viewing of our products.

SCALABLE CUSTOM SOIL BLENDING

Get everything you want, and nothing you don't. We blend soil to your exact specifications so you can get repeatable results from your product. From fertility packages and biological products, we have additives to make sure the soil is exactly what you want.

RESOURCES + EXPERTISE

We're not just vendors. We're true partners, ready to share our vast experience to help you optimize your operation. We don't ever bring anything to market without third-party testing and verified, repeatable results.
